**PERSONAL
SUMMARY**

Graduated from Aristotle University of Thessaloniki, Department of Civil Engineering (Greece, QS World Ranking 51-100). Expertise on Transportation Engineering and Project Management by choosing the respective division within the general program of studies. The 5 year study program grants a diploma in civil engineering and the level of qualification is integrated master (1st and 2nd cycle). Analytical thinker with holistic course of thought and also highly organizing and multitasking attributes. Creative and quick problem solver with teamworking skills. Thus the candidate would be an excellent fit for a forward-thinking and ambitious job.

**CIVIL
ENGINEERING
SKILLS**

- Transportation Planning and Engineering
- Traffic Control
- Transportation Systems
- Design and Construction of Road Pavements
- Design and Infrastructure of Airports
- Public Transportation
- Transportation Economics
- Urban and Regional Planning and Development
- Construction Management
- Management Road Work
- Road Safety
- Road Engineering
- Railway infrastructure
- Investment Evaluation
- Data Collection and Statistical Analysis

**GENERAL
ATTRIBUTES**

- Holistic Course of Thought
- Analytical skills
- Multi-tasking
- Hard Working
- Enviromental friendly thinking
- Team Management
- Team Leading
- Communicative
- Fluent in Greek and English
- Canadian Citizenship

**TECHNICAL
SKILLS**

- MS Office
- AutoCAD
- IBM SPSS Statistics
- Quick Software Learner

**HOBBIES
AND LEISURE
ACTIVITIES**

- Piano studies
- Song-writing
- Workout

ACADEMIC

Aristotle University of Thessaloniki, School Of Engineering, Department of Civil Engineering, Division of Transport and Project Management. Diploma in Civil Engineering (Integrated Master, 1st and 2nd Cycle).

PRACTISE

- Municipality of Veria (Greece), Technical and Maintenance Projects Department (July – August 2014). The candidate has worked in various tasks including:

- 1) School construction supervising in various phases of construction within the time schedule, material orders, supervision of fair technical construction in real time.

- 2) Road repairs supervision.

- 3) Urban renovation site supervising in the town complex (measuring length of pavements and road widths, reconstruction of road, sign placements, monitoring traffic behavior, side-technical projects supervision).

- 4) New city planning and renumbering lots using proper geotechnical device. Digitalization in AutoCAD.

- 5) Measuring public building surfaces and windows for inclusion in the new thermal regulations of Greece.

- 6) Draft budget for humidity curing pit in the perimeter of a public pre-school.

- 7) Various safety issues regarding blind-spots on roads and big slope pavements.

- Secretariat services at Insurance Broker's agency (Michailidis & Sinergates) in Veria (July – August 2017). Various tasks including communicating with clients and associated offices, draft pricing car insurance contracts using software.
