Dear Sir/ma'am,

It is with great interest that I apply to the position of Junior Environmental Engineer at 30 Forensic Engineering. My resume is attached for your review.

I Jainil Raval have dual post-graduation in Sustainable business management and Environmental Building Sciences at Conestoga College. Through my program and work experience, I have developed great green building management concepts, customer skills and the ability to work together as a part of a team.

My work experience at a Restaurant has helped me built great customer skills and work habits. I am confident that if given chance to prove myself you would not be disappointed with me or the skills that I possess as in Sustainable business management and Environmental Building Sciences graduate. I do lack a bit of an experience but I can assure you that I would make up for that with my excitement and enthusiasm.

I am confident that my enthusiasm and my skills would be valuable to your team at 30 Forensic Engineering in the Junior Environmental Engineer position. Thank you for considering my application and I look forward to seeing you in person for an interview.

Sincerely,

Jainil Raval  
Encl.

## Objective

---

Yielding strong passion for Sustainable business management and Environmental Building Sciences and Skilled at operating at wide range of platforms

## Summary

---

- Quick learner and hard worker
- Good problem solving and troubleshooting skills
- Work efficiently under pressure
- Able to learn new technologies quick and easy
- Operation analysis
- System analysis
- Project Chronology
- Building and construction
- Light and energy efficient Design and analysis
- Solar Geometry
- Surveying
- Good individual performer and equally good team player

## Skills

---

### Technical Skills

- Environmental Benchmarking
- Risks assessment of building & building condition review
- Hazardous Waste Analysis
- Waste Water disposal & waste audits
- Management of material resources
- Hazardous waste site worker training
- Entry level eQuest

### Environmental Management Skills

- Adoptability
- Integrity
- Scheduling and budgeting of project
- Substance Sampling
- Technical report writing
- Site control and safe work practices

### Customer Skills

- Able to maintain a good relationship with the customers
- Commutation with customers in friendly and a professional manner.
- Capable of dealing with hundreds of customers on a day to day basis.

## Academic project

---

- Building conditioned review:** - In that, we did the visual inspection of the building for the asbestos and other designated substances. We also did the structural review of the building mainly roof. For the reference we follow the ASTM standard.
- Sustainable business plan of Waterloo Catholic District School Board:** - In that, we create the sustainable business plan for the St Benedict, Cambridge. In the we did benchmark form their data of water, gas, electricity and doing the waste auditee for the waste data. So, we Recommend at the best practice for reduction of water& energy consumption, waste reduction and division at St. Benedict.
- Environmental impact assessment:** - we calculate that what part of the road transportation effect the major contribution of creating the Co2, Co, NOx and PM10. We also defined what time the concentration higher, how it effects on the urban environment and recommendation.

## Work Experience

---

- Work under civil engineer on the different renovation project from September 2016-2017.**
- Customer Service provider at Daal Roti Restaurant from November 2017 till date.**
