Mahmoud Abourich

Career Summary

Mahmoud is a consultant with four years of experience in Environmental Consultancy. He has delivered work in Environmental Impact Assessment (EIA), air quality, noise and vibration monitoring, and other environmental assessments on multiple projects at various stages of development, within the Middle East region.

Mahmoud's experience at Anthesis Group and WSP has exposed and enabled him to work with global corporations, governmental bodies and local developers in the UAE, Oman, Qatar and across the GCC. His skills include instrumental research analysis and lab techniques. Collecting, analysing and showing attention to detail in planning strategies for their solutions. Adhering to specified health and safety procedures, undertaking in-depth investigations and using a variety of approaches to reach scientific conclusions.

Born and raised in the United Arab Emirates, Mahmoud has adopted a proficient understanding of the GCC region market. He played a key role in developing project proposals and liaisons with contractors, consultants and regulatory authorities. This has accustomed him with a wide understanding and experiences dealing with projects at different stages.

In addition, the United Arab Emirates has provided Mahmoud a taste for multiculturalism. He has encountered with diverse cultures, ethnicities and social systems. This has enabled him to assimilate within and apply different management structures. Mahmoud is proficient in both English & Arabic and is able to communicate at a fundamental level in Spanish and Urdu, which has expanded his connection with the regional and global populace.
